Radio Remote Controls by

THE MOBILE HYDRAULIC EXPERTS

NOVEMBER 2018

What Makes for Good Radio Remote Controls?

As with any industrial products, customers expect quality and dependability with radio remote controls. Beyond that, a good radio should be safe, durable, and have components that are easy to operate. When purchasing HBC Radiomatic radio remote controls, users should expect high-value radio systems that are known as the safest and most robust available on the market.

With "safety-first" as the top priority, all HBC Radiomatic systems are designed to minimize any dangers that could influence the operation of remote radio controls. Frequency interference protection, fail-to-safe functionality, startup interlock, drop protection, and tilt protection are just a few features that make applying HBC Radiomatic remote controls safer.

Who Uses Radio Remote Controls

Kraft has specified radio remote controls for numerous applications in the mobile OEM market. Track-drive vehicles represent a large portion of Kraft's HBC Radiomatic business. Applications include construction equipment, forestry equipment, agricultural machinery, mining equipment, emergency response vehicles, marine cranes, material handling equipment, and many categories of specialty machinery.

"Our radio remote control clients are looking for the safest and most reliable performance to assist operating their machines. HBC Radios have a reputation of high-quality, durability, and the best safety in the industry. It's easy to recommend HBC Radiomatic to our clients."

-Scott Durand, VP Sales & Marketing

Successful applications result when the client can fully describe the equipment's functionality goals. Kraft works directly with the

client to identify their exact needs making sure the HBC Radiomatic system meets all requirements.

Why Buy HBC Radio Remote Controls from Kraft?

Kraft's field sales and technical service departments are familiar with and have been factory trained on all HBC Radiomatic radio remote control products. The Mobile Hydraulic Experts at Kraft understand OEM off-road equipment, mobile hydraulics, electronic controls, and the need for safety when operating equipment via radio remote control. Our staff has specified hundreds successful radio remote control applications.

Warranty

HBC offers a two-year manufacturer warranty on complete radio systems excluding "wear" items, which carry one-year coverage.
