Solenoid Operated Valves

THE MOBILE HYDRAULIC EXPERTS

JUNE 2019

Reliability and Performance are Assured When You Choose HydraForce® Solenoid Operated Valves

Using quality components is an important part of any mechanical system. Flexibility and size are especially important when designing a hydraulic circuit.

HydraForce offers a broad range of solenoid and proportional valves. Their extensive product offering ensures that your system can achieve maximum performance with minimal waste, heat, or parasitic system losses.

Reliability and performance are also key when choosing a solenoid operated valve. Inclement weather, heat, and low voltage conditions are prevalent in off-highway equipment and can significantly affect system performance.

All solenoid valves produced by HydraForce are designed to offer long-life and reliable operation in the harshest conditions. Simply put, these valves will perform as advertised even in the most extreme operating environments.

Plus, HydraForce offers a best in class product warranty of 5 years from the date of shipment, which is the longest in the industry.

Why Purchase HydraForce Solenoid Operated Valves from Kraft?

Kraft Fluid Systems inventories, sells, and services a full range of HydraForce solenoid operated cartridge valves.

We utilize our team's vast experience and wide range of readily available options to provide the best fit solenoid valve for your application. With our team of experts and top-quality components, we provide the best solutions to maximize efficiency for mobile hydraulic systems.

"HydraForce offers best in class cartridges and valve assemblies to meet virtually any custom valving need. We've represented HydraForce for more than 30 years and consider them one of our best partners."

-Dan Thomas, Engineering Manager

Full Line Stocking Distributor

Kraft has sold thousands of custom HydraForce valves systems during our 30-year partnership. Our Sales and Applications Team has the right experience, training, and hands-on skill to make your next OEM valve project a success.
